Profile

I work with software, networking, and servers, driven by a desire to understand how things work and to push systems to the point where they truly make sense. Pragmatic and results-oriented, with a focus on optimization. I seek maximum performance with the least amount of resources, constantly refining until real quality is achieved. My natural focus is on backend, infrastructure, and networks.

Experience & Education

Software Engineering Student

2024 - 2028

Universidad Cooperativa De Colombia

Acquiring solid fundamentals in algorithms, databases, and architecture, supplementing theory with a self-driven interest in infrastructure and networks.

Key Projects

UniShop

github.com/Whatfck/UniShop

E-commerce platform designed for the university community, facilitating the purchase and sale of products among students.

Web Player

github.com/Whatfck/reproductor-web

Modern audio playback application with an intuitive interface, playlist support, and advanced controls.

Multilingual Portfolio

github.com/Whatfck/portafolio

Personal portfolio built with Next.js to showcase professional profile, experience, skills, and projects with dynamic localization and brutalist design.

References

"Daniel proved to be a serious, responsible professional committed to his work. He stood out for his analytical skills, his clarity in communicating information, and his focus on providing useful solutions."

— Sandra Muncayo (Doctor / Head of Health Services, Red Medicron)

"Daniel is an intelligent, dedicated, and proactive person, with a natural ability to learn and face challenges. He stands out for his discipline, commitment, and ability to apply his knowledge in practice."

— Julian Cañar (Systems Engineer / Freelance)
